Two year warranty applies only to the radio chassis from these GP Professional Series. GP240/280/540/580 radios, as well as batteries, chargers, other accessories and options, do have a 12 month warranty. All design, material and manufacturing errors and the costs incurred to repair such malfunctions are for the account of Flash. This warranty shall not apply to any defect or disturbance arising out of improper use.

Sales Prices

Motorola GP Analogue ATEX Two-way Radios

Description	Sales Price	Item Code
<p>Conventional ATEX radios are available in 2 models: 12.5 kHz and 20/25 kHz. The frequencies of the 12,5 kHz radios are nearer to each other than the frequencies of the 20/25 kHz radios. In general the 12,5 kHz radio is used in Belgium and the 20/25 kHz radio in The Netherlands. The European standard for trunking ATEX radios is 12,5 kHz.</p>

Sales Prices
Analogue & Digital Trunking Systems

For group communication with a larger number of groups at larger locations, Flash offers analogue and digital trunking systems. These computer controlled systems classify users into groups and have programmed priority levels. This offers opportunities to allow certain groups (security employees, for example) priority above all other calls. This eliminates malfunctions in the communication process.

TETRA

Digital TETRA systems offer extra possibilities alongside the advantages of trunking. These include telephony and extensive data transmission and reception options, allowing for consulting of databases during the call. TETRA can have the most complicated organisation models communicate efficiently.

Read also the extensive information about trunking, several systems and trunking radios at www.flash-services.com under Trunking radios.

Prior to a price quotation of a trunking system, a presentation is given of the system, and an inventory made of the wishes and requirements of the organisation. The optimum configuration is then compiled on the basis of these findings. A subsequent range test is then part of the definitive set-up.

Would you like to know whether trunking can offer your organisation advantages? Feel free to contact us.
